Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets with the Wi-Fi air interface have clear and effective disclosure that the handset has not been tested for hearing aid compatibility with respect to its Wi-Fi voice operation? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? No

Website address:

Explain: Brookings Municipal Utilities d/b/a Swiftel Communications (“the Company”) is a small rural service provider that provides service in conjunction with Sprint PCS. The Company maintains a web site with basic information about its service offerings at <http://www.swiftel.net>. Because the Company lacks the personnel and resources necessary to maintain an extensive site (and because such resources are better used for extending service to rural and underserved areas), information about the Company’s Sprint PCS services and a complete list of Sprint PCS hearing-aid compatible handset offerings is provided at <http://www.sprint.com>. An explanation of the HAC rating system, along with links to industry resources and information on other wireless accessibility options for the deaf and hard of hearing are readily available at http://www.sprint.com/landings/accessibility/hearing_aid.html.

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Along with providing detailed information about hearing aid-compatibility of wireless phones on the Company’s web site, the Company has instructed its sales staff about the availability of hearing-aid compatible phone models and it has signs in each store advertising the availability of hearing-aid compatible devices. The Company also has wireless industry pamphlets available that customers can take home with information on the FCC’s requirements and HAC rating system. To the extent that additional information is developed by industry or the hearing impaired community on the compatibility of certain phone models with particular hearing aids, the company will endeavor to make such information available to consumers.

Methodology for Functionality Levels

Levels of functionality and methodology for determining functionality are as follows:

- Handsets (entry-level, mid-tier and high-end phones)
- Smartphone/PDAs (devices that run complete operating system software as a platform for application developers)
